

2024 Advanced Medical Dermatology Course Australian Institute of Dermatology

Dear Colleagues,

The Advanced Medical course is for candidates who have passed the Institute's Membership course. It is particularly aimed at doctors wishing to set up a skin practice where they are seeing and managing more complicated dermatology cases. It will cover Medical Dermatology, Medical Dermatoscopy, Dermatopathology and Cosmetic Medicine over two Semesters of 15 weeks each semester.

The course will be very much case based teaching. It will follow the guidelines in the recent changes by the American Academy of Dermatology to the way it Board Certifies its Fellows. The Advanced Medical Course is completely online with recorded Webinars every two weeks to go over topics previous candidates have had difficulty with. There are recorded videos on all the topics and video webinars going over the answers to each module's assessment questions. The assessment questions are not marked but are there to help you confirm your learning.

Those attending the Advanced Medical Course can also attend the Membership course webinars for free if they wish. The Membership course will begin at 7PM on the Thursday evenings.

There will be no marked Module assessments but there will be an online examination after each semester. If you have other questions then please email me at imccoll@ozemail.com.au. Candidates who complete all the Advanced Course Semesters both Medical and Surgical are eligible to take the Institute's Fellowship course in 2025.

Further information on the course can be found at www.aideducational.com under Advanced Course in the Courses tab. The Registration forms can be found under the Contact or Register Tabs of the www.aidadvanced.com website.

Best wishes

Ian McColl FACD
